**RE:Second Notice - Backflow Prevention Test Required**

Dear Denver Water Customer:

Our records indicate the backflow prevention assemblies on water service lines for the properties listed on the back of this page are now past due for annual testing. Each address is noncompliant per state regulations and poses a potential public health risk.

**Failure to comply may result in suspension of service, including the fire service (if affected) and assessment of fees including a \$250 penalty if the service proceeds to suspension status. This penalty will go into effect on May 1, 2025.**

If you have tested the assemblies, please submit copies of the test reports to Denver Water's Cross-Connection Control Office. If you have not yet tested the assemblies, please share this letter with the tester you hire.

If an assembly fails, the tester must call Denver Water at 303-628-6442 within 24 hours and submit a copy of the failed test report within three business days.

All test results must be submitted by one of the following methods:

- Email (scanned test reports only): [crossconnectioncontrol@denverwater.org](mailto:crossconnectioncontrol@denverwater.org)
- Fax: 303-794-8325

More information about backflow prevention and annual testing requirements can be found at [www.denverwater.org/backflow](http://www.denverwater.org/backflow).

**If you are not using water at this property or have received this notice in error, please contact Denver Water at 303-893-2444. If another party, such as a building manager or landlord, should receive this letter, please forward this letter to the appropriate party.**

Sincerely,

Denver Water  
Cross-Connection Control Office

(see other side)
