RE: Backflow Assembly Test PAST DUE - SA Bighaus, LLC 19479 Babcock Rd San Antonio, TX 78255-2533

Dear Water Customer,

According to our records, SAWS has not received the required proof of annual backflow assembly inspection and testing for the device(s) listed below by April 12, 2025.

As a result of this violation, your water service may be shut off without any additional warning and a backflow enforcement fee will be assessed to the account.

Backflow prevention assemblies keep water that has already been piped into homes and businesses from "flowing back" into the distribution system. Annual testing is required by City of San Antonio ordinance and state regulations. **This testing ensures the public water supply, as well as your home or business, is protected from harmful or even deadly contamination.**

Size	Manufacturer	Model	Serial Number	Hazard	Location
2"	Febco	860	H29042	Irrigation	Front Of Clubhouse

You are responsible for hiring a licensed backflow tester to perform the annual test and certification of the backflow assembly(s) listed above (BSI does not test backflow assemblies). The results from your backflow test must be submitted by your testing company within **15 DAYS** from the date of this letter. Please provide the CCN listed in the top right corner of this letter to your backflow tester, as they will need this number to properly file your backflow test reports via BSI Online. Please visit www.bsionline.com and use the CCN listed above to check on your test report status or to find a list of local backflow testers. Please contact BSI via e-mail (support@backflow.com) or phone (888-966-6050) if you have any questions. Thank you for your cooperation and for helping to protect our water resources.

If you believe you already had all your backflow prevention assemblies tested, please check with your licensed backflow tester to ensure the report(s) have been submitted to BSI Online.

Sincerely,

Christine Walsh, Vice President
 BSI / Agent for San Antonio Water System - PWSID # TX0150018
