## PAST DUE FINAL TEST NOTICE

RE: Backflow Prevention Assembly

Location: 8" MASTER:LEFT OF BLDG

Service Address: WS-COMLG, 10044 ST MARKS RD WINDERMERE

Dear Customer:

Our records indicate you have been notified to test your backflow prevention assembly. To date, we have not received your backflow test report. The test results are now PAST DUE.

Your Backflow Assembly information is listed in the upper right corner of this page. This device is located at your water meter connection. The backflow assembly test is essential as mechanical backflow assemblies have internal check valves, springs, seals, and moving parts that are subject to wear or weakness over time and are not always reliable unless maintained and tested annually.

A Certified Plumber or Backflow Tester can assist you with this test.

**Results must be faxed to 407-836-6830, or mailed to Orange County Water Division, 8100 Presidents Dr, Suite C, Orlando, FL 32809.**

For your information on the reverse side of this notice is a county web address for a list of registered Backflow Tester's, that can be viewed on Option 3, BF – Back Flow Tester at: [www.ocfl.net/eBuilding/ContractorSearch/contractorsearch.asp](http://www.ocfl.net/eBuilding/ContractorSearch/contractorsearch.asp)

Please forward this letter to the correct person or local management if necessary. Your prompt attention to this matter is greatly appreciated.

If you have any questions or concerns please contact the Cross Connection Control section at 407-836-6873 or 407-836-6970.
